## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. **Claims 5 and 8** are allowed.
2. The following is an examiner's statement of reasons for allowance: Independent claims 5 and 8 identify the uniquely distinct feature for "wherein when said operation specification of said child device is to be changed, said child device sends a change demand signal corresponding to a content of change as said control information, and said parent device receives said change demand signal sent from said child device, determines whether or not the content of change corresponding to said change demand signal is permitted, and when the change is permitted, sends a change permission signal and an operation parameter for defining operation specification to be employed by said child device after the change." The closest prior art, Kanade et al. (US 7,027,083), Zhang et al. (6, 864,911), Cooper et al. (US 5,995,140), Steinberg et al. (US 6,006,039), Zwahlen et al. (US 5,854,654) and Takashi (JP 2000-102073) disclose systems and devices for synchronizing multiple slave/child camera devices with parent devices, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
